HOPE BRUSSTAR

I graduated from the University of New Orleans in 2019 with a B.S. in Mathematics, Magna Cum Laude. While there, I was also the Editor-In-Chief for our university newspaper. After graduation, I worked for a year and a half as a legal assistant for an insurance defense firm in downtown New Orleans.

It is with this varied background that I now aid law firm clients from the beginning to the end of the data analytics process to help them better understand their needs and make informed decisions for their businesses.

My work includes identifying what questions need to be answered, gathering and cleaning data, distilling the data to gain insights, and preparing and presenting visualizations for client reference. I also enjoy researching new innovations to the way our company works.

I enjoy working collaboratively with my other PerformLaw team members to help clients both maintain their operational health and explore their potential for growth.

In my free time, I like to read, create art, learn languages, watch movies, eat good food, and travel.
